How to use your trackers

1. Print only the pages you'll use. Most people start with the **Payday tracker** and **100 squares**.
2. Write your numbers in your own currency. Every tracker leaves the amounts blank.
3. After each payday, tap **I did it** in the app, then color your squares in yellow.
4. Put one tracker where you'll see it: the fridge, a mirror, inside a cupboard door.

The app pays the smallest debt first, unless one grows even with its minimum. When one is gone, its minimum moves to the next. Your payday amount stays the same.

One down is the hardest one.

TRACKER 5

Buffer tracker

Your buffer is money for surprises. It fills first, so the next car repair doesn't go on a card.

My goal _____ Each box = goal ÷ 20 _____

It lives in _____

1	2	3	4
5	6	7	8
9	10	11	12
13	14	15	16
17	18	19	20

Used some?

That's what it's for. Tap **I used some of it** in the app, erase or cross out the boxes you used, and refill them. The plan refills it first.

A buffer turns a crisis into an errand.

TRACKER 6
